**DETAILED ACTION**

***Election/Restrictions***

***Species election***

1. Claims 1, 6, 33 and 37 are generic to a plurality of disclosed patentably distinct species comprising the bovine traits of marbling, tenderness, quality grade, muscle content, fat thickness, feed efficiency, red meat yield, average daily weight gain, disease resistance, disease susceptibility, feed intake, protein content, bone content, maintenance energy requirement, mature size, amino acid profile, fatty acid profile, milk production, a milk quality susceptibility to the buller syndrome, stress susceptibility and response, temperament, digestive capacity, production of calpain, caplastatin and myostatin, pattern of fat deposition, ribeye area, ovulation rate, conception rate, fertility, and susceptibility to infection with and shedding of pathogens. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.
2. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

***Sequence election***

3. This application contains claims directed to 42,904 patently distinct inventions, specifically, the individual SEQ ID Nos. 19473-21982 and 24493-64886. Furthermore, the sequence searching in multiple expansive databases has put undue burden on the examiner and office resources. Applicant is required to elect a single SNP sequence from the group of the SEQ ID NOS 19473-21982, and to elect a single oligonucleotide sequence from the group of the SEQ ID NOS 24493-64886. This is not a species election. Applicant will be required to cancel non-elected subject matter upon indication of allowable subject matter.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David C. Thomas whose telephone number is 571-272-3320. The examiner can normally be reached on 5 days, 9-5:30.
